ADI Group Creates New Position

FREDERICTON, NB (December 1, 2010) – Hollis Cole, CEO of ADI Group Inc., announced the addition of José Leão to the ADI team. ADI Group created the new position, Manager of Biogas Applications for ADI Systems Inc. one of the ADI Group of companies. This new position allows ADI to place greater emphasis on worldwide opportunities of utilizing biogas, a viable source of green energy.

Mr. Leão comes to ADI with over 30 years experience in engineering, logistics and operations plus strong academic and professional credentials (BSEE, Sir George Williams University, MLE, G.W. University, MBA, Rushmore University). Fluent in six (6) languages, his background in biogas utilization and green energy systems complements the strong technical abilities of existing staff at ADI.

“As a leader in environmental technologies around the world, it is important to continue to broaden our base and expand into new markets. I am confident the skills José brings to ADI Systems will assist us in providing further value to our customers,” stated Mr. Cole. “The ADI team has consistently been a market leader, and we look forward to continued excellence on existing and future projects.”

The ADI Group of companies offers a wide range of services including design-build industrial wastewater treatment plants, membrane cover systems, project and construction management services to industries and governments worldwide. ADI has projects in 40 countries around the world.
